MEETING AGENDA

DATE: Monday, May 21st, 2012
PLACE: Rotary Room, Milton-Freewater Community Building
TIME: 7:00 – 8:30 p.m.

Review minutes of the last meeting – April 16th, 2012

Smith Concrete Berm fish passage project update – there are still discussions fine-tuning the design concept. Designs are going out for review. Construction may occur as soon as this summer.

Zell Irrigation Diversion fish passage project update – final designs are being developed. The goal is to complete designs and permits this spring and construct late this summer. The point of diversion transfer issue is still a concern.

Nursery Bridge fish passage project update – The Corps has now decided that a channel stabilization structure needs to accompany the right bank levee repair. The goal is now to complete design and go to construction the summer of 2013. The channel stabilization structures will also be designed to ensure fish passage. Funding for design will come from CTUIR and MFWCD.

Shallow aquifer recharge water – progress was made at last month’s meeting with Oregon state agencies and CTUIR staff regarding the water needed for recharge sites that are ready to go and others that are in development. There was also discussion regarding how to legally convey that water to the sites.

Burlingame Canal Seepage Analysis – prior to piping the upper portion of the canal a water seepage loss analysis is being conducted to calculate the savings back to the river and inform recharge mitigation amounts.

Bylaws review

Announcements

STELLAR science education position – Graham Banks hired

Next Meeting: June 18th at the Rotary Room, Milton-Freewater Community Building, 5th Ave. and Ward St, 7:00-8:30 p.m.
