MEETING AGENDA

DATE: Monday, September 15th, 2014

PLACE: Rotary Room, Milton-Freewater Community Building
TIME: 7:00-8:30 PM

7:00 - Review minutes of the last meeting – August 18th, 2014

Bi-state Walla Walla Streamflow Improvement Study - The Steering Committee will be individually interviewed regarding water management project types, then will reconvene as a group to prioritize stream flow improvement actions for engineering analysis so we can allocate the remaining funds to investigate piping, irrigation efficiency, Recharge, pump exchanges, and reservoir projects.

Nursery Bridge Fish Passage – designs were finalized September 5th for a roughened riffle fish passage project that will be 500 feet long extending downstream of the fish ladder and stilling basin and will cover the channel tying in to the lower portions of the levees on both sides of the channel with large rock. The riffle is designed to be a slope of 2.2% and will average around 5 feet thick. We anticipate receiving all permits and awarding a contract later this week. A more comprehensive project is to be designed and constructed next summer. The eastside levee repair project is wrapping up and the Corps stilling basin repair project is scheduled for completion at the end of September.

White Ditch Piping – progress update

Eastside Aquifer Storage and Recovery - feasibility analysis update

Water Monitoring Technician Position - A Technician will be hired in October. Job notices have gone out.

Announcements

Next Meeting: October 20th, 2014 at the Rotary Room, Milton-Freewater Community Building, 5th Ave. and Ward St, 7:00-8:30 p.m.
